## F

### **Read Instructions**

We recommend that you read this Instruction Manual before installation.

## Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to follow the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

### Programming

This device can be tested and programmed manually. Advanced programming requires knowledge of the TIS Device Search software and instruction in the TIS advanced training courses.

## Simple Installation

You can use 2 screws to install this panel on wall; it fits on most junction box sizes.

## **Mounting Location**

Install in a dry, indoor area. with a suitable temperature and humidity range.

TIS Logo is a Registered Trademark of Texas Intelligent System LLC in the

United States of America. This company takes TIS Control Ltd. in other countries. All of the Specifications are subject to change without notice.

### **Data Cable**

Use screened stranded RS485 data cable with four twisted pairs. Configure devices in a "Daisy Chain."

Do not cut or terminate live data cables.

## **Electrical Wires**

The recommended wire size for light channels is 1.5mm - 2.5mm for loads, if you are using the Panel Addition 3R type. The installer should consider the total current consumption when selecting the wires.

### Warranty

There is a two-year warranty provided by law. The hologram warranty seal and product serial number are available on each device.

## INSTALLATION MANUAL LUNA 9 GANGS TOUCH PANEL MODEL: LUNA-9GANGS

### LIGHTS / SHUTTERS PROGRAMMING

You can pair the light channels with any wall panel. To do so, follow these steps:

Press any button on any channel of a relay or dimmer module for 6 seconds so that the LED indicator light of that button starts blinking.

2>> Shortly press on any button on wall panel or press the wall switch that connected to dry inputs of the panel addition zones.

**3** Test the button on the panel by short pressing it for ON/OFF and long pressing it to dim (if channel is dimmable).

Tris

## TROUBLESHOOTING

0

The panel's white LED blinks rapidly

**Reason:** The panel address conflicts with another device in the TIS network. You need to press and hold the 9<sup>th</sup> button (IR middle button) for 6 seconds so that the panel can get a new address.

R

The panel buttons' LEDs do not turn ON, and the device is not powered

The wall panels fail to pair with

The wall panels fail to control

the device channels.

other devices

**Reason 1:** There is no TIS-BUS power or no connection to the L/N input (if used AIR bus-3W converter).

**Reason 2:** The TIS 24V power supply is not connected to the TIS-BUS.

**Reason 1:** The TIS-BUS connection has a problem, or the wire has a short.

**Reason 2:** The manual programming function is disabled on the device (it is enabled by default).

**Reason 1:** The TIS-BUS connection has a problem, or the wire has a short.

**Reason 2:** The programming address is faulty.

**Reason 3:** The panel is locked. You need to unlock it by swiping from up to down in the middle of the panel.
